

AD56-16 Series Indicator Light with Flash Buzzer

The AD56-16 series indicator light is a compact and reliable signaling device. This model features a flash buzzer, providing both visual and audible alerts.

Overview

Compact Signaling Solution

The AD56-16 series is a compact and reliable signaling device designed for space-constrained industrial environments. Featuring a 16mm mounting diameter, this unit integrates both visual and audible alerts through its built-in flash buzzer. It is engineered for durability and consistent performance in control panels, machinery, and various industrial equipment applications.

Technical Specifications

Key Features

- Compact design for limited space
- Combined visual and audible alarm
- Robust construction for industrial use
- Standard 16mm panel mounting

Mounting Diameter	16 mm
Signal Types	Indicator Light, Flash Buzzer
Voltage Compatibility	AC/DC 12V
