Overview

High-Performance ARGB Cooling Solution

This 12cm addressable RGB cooling fan is engineered for both optimal thermal management and stunning visual aesthetics. Featuring a super quiet hydraulic bearing, it ensures efficient heat dissipation with minimal noise, making it ideal for gaming PCs and high-performance systems. The dual-ring lighting design provides vibrant, customizable effects that can be fully synchronized with your motherboard and other ARGB equipment.

Technical Specifications

Fan Size	120 mm
Bearing Type	Super Quiet Hydraulic Fan

Compatibility & Control

Synchronization	Motherboard SYNC, ARGB Equipment Compatible, Addressable RGB
Software Control	Compatible with most motherboard ARGB control software for synchronized lighting effects.

Installation

Mounting

- Standard mounting holes
- Easy installation for computer cases
- Compatible with CPU coolers

Key Features

Performance Highlights

Low Noise • High Airflow • Dual Ring RGB • Hydraulic Bearing
