

Adjustable 800mm Speaker Stand

This adjustable speaker stand is designed to elevate speakers to an optimal listening height of 800mm. It features adjustable spikes for leveling on uneven surfaces and minimizing vibrations.

Product Overview

Professional Audio Support

This adjustable speaker stand is engineered to elevate your audio equipment to an optimal listening height of 800mm. Constructed from high-gauge cold-rolled steel, it provides a stable and secure platform for bookshelf speakers or studio monitors. The design includes a universal hardware pack for easy installation and is available in either a silver or white powder-coated finish to suit various aesthetic environments.
