

# Adjustable Aluminum Telescopic Ladder

This telescopic ladder is made from lightweight and durable aluminum. Its adjustable height and safety locking mechanism make it suitable for various tasks.

## Product Overview

### Versatile and Portable Access Solution

This adjustable telescopic ladder offers a lightweight and creative design, making it an ideal choice for both home and office environments. Engineered with premium aluminum and a durable oxidation-treated surface, it provides excellent rust resistance for long-term reliability. Its space-saving, foldable construction ensures easy transportation and storage, meeting the rigorous demands of professional use.

## Safety & Standards

### Safety Mechanisms

- Integrated safe lock system
- TPR anti-pinch blocks
- Non-slip cellular foam handles
- Anti-rust surface oxidation

### Quality Standards & Patents

EN131 Certified, National Patent, European Patent, USA Patent Pending

## Technical Specifications

### Typical Applications

- Home maintenance
- Office tasks
- Clean room environments
- Roof snow removal

### Primary Material

Top-grade aluminum with positive pole oxidation
