Adjustable Analytical Instrument Platform with Clamp Base

This precision-engineered analysis instrument features adjustable vertical and horizontal arms. Designed for experimental analytical applications, it provides stable and versatile support for various instruments and apparatuses with its robust clamp base.

Product Overview

Precision Analytical Support

This adjustable analytical instrument platform is designed for high-precision experimental applications. Featuring a robust clamp base, it ensures secure attachment to various work surfaces. The system incorporates highly adjustable vertical and horizontal arms, allowing for the precise positioning of analytical components to meet specific laboratory or experimental requirements.

Design & Construction

Model Identifier

V-3

Mounting Method	Clamp Base
Adjustment Capabilities	Vertical Adjustment, Horizontal Adjustment, Precision Positioning

Application

Primary Usage

- Experimental Analytical Applications
- Instrument Support
- Apparatus Stabilization
