

Adjustable Angle Hydraulic Notcher

This hydraulic notcher is designed for creating precise notches in metal sheets and profiles. Its adjustable angle settings and robust hydraulic system ensure efficient and consistent cutting performance.

Overview

Precision Hydraulic Notching

This adjustable angle hydraulic notcher is engineered for high-speed, precision metal fabrication. It offers a versatile cutting range from 30° to 140°, making it suitable for various sheet thicknesses and material types. Designed for industrial efficiency, the machine includes integrated punching capabilities up to 40 mm and advanced positioning systems to ensure clean, accurate shearing edges.

Technical Specifications

Cutting Angle Range	30° - 140°
Max. Cutting Thickness	6 mm
Max. Cutting Length	200 mm
Max. Punching Diameter	40 mm
System Pressure	18 MPa
Motor Power	4 kW
Max. Travel	42 mm

Dimensions and Weight

Overall Dimensions	1060 x 900 x 1210 mm
Net Weight	1020 kg
Gross Weight	1100 kg

Features

Standard Accessories

- Shearing blade
- Mobile foot pedal switch
- Sheet metal compactor
- Sheet metal location system
- Angle gauge device

Key Operational Benefits

High Speed, Precision Cutting, Compact Design, Adjustable Angle, Punching Function
