

Adjustable Appliance Support Leg

Adjustable support leg designed for dishwashers and similar appliances. It provides stability and leveling for proper installation and operation.

Product Overview

Professional Appliance Support

This adjustable support leg is engineered to provide essential stability and precise leveling for dishwashers and similar heavy-duty appliances. Designed with durable, corrosion-resistant materials, it ensures even weight distribution and effectively reduces operational vibration. The adjustable height mechanism allows for seamless customization, making it an ideal solution for both new installations and reliable replacement needs.

Technical Specifications

Usage Context

Replacement Part • New Installation

Material	Metal with protective coating
