

Adjustable Brass Fluid Nozzle

Precision-engineered for versatile fluid control, this adjustable brass nozzle is constructed from high-quality brass for durability and corrosion resistance. It provides a smooth transition between spray patterns, from a concentrated jet to a wide cone spray.

Product Overview

High-Performance Fluid Control

This precision-engineered adjustable brass nozzle is designed for versatile fluid control across a wide range of industrial applications. Constructed from high-quality brass, it offers exceptional durability and corrosion resistance, ensuring reliable performance under varying pressure conditions. The nozzle features a knurled grip for easy manual adjustment, allowing users to transition smoothly between concentrated jets and wide cone spray patterns.

Durability

Corrosion Resistant • Precision Engineered • High Durability

Key Features

Performance Highlights

Brass

Material

Variable

Flow Rate

Technical Design

Spray Patterns

- Concentrated jet
- Wide cone spray
- Smooth transition between patterns

Material

High-quality brass

Adjustment Mechanism

Knurled grip for secure handling

Applications

Ideal Use Cases

- Variable flow rate requirements
- Precision fluid delivery
- Dispensing systems

Compatible Fluids

Water, Air, Compatible Fluids
