Overview

Industrial Cantilever Storage Solution

The Adjustable Cantilever Rack is designed specifically for storing odd-shaped, long, and bulky objects such as timber, pipes, furniture, and structural steel. Featuring an open-front structure, it allows for efficient loading and unloading using lift trucks or cranes, while the adjustable arm elevations accommodate varying bundle sizes. Its robust design supports single or double-sided configurations and allows for easy future expansion in warehouse or manufacturing environments.

Technical Specifications

Compatible Lifting Systems

- Lift trucks
- Mobile cranes
- Stacker cranes

Arm Adjustment Increment

50 mm or 75 mm

Construction Material

Hot-rolled metal beams

Configuration Options

Single-sided, Double-sided, Expandable

Applications

Suitable for Storing

Timber • Plywood • Furniture • Appliances • Pipes • Structural Steel

Ideal Environments

- Warehouses
- Distribution centers
- Manufacturing facilities
