

Adjustable Children's Swim Training Belt

The children's swimming floatation belt is designed to provide buoyancy and support for young children learning to swim. Constructed from durable, closed-cell foam, the belt features multiple removable foam pads, allowing for adjustable buoyancy as the child's swimming skills improve.

Product Overview

Designed for Learning

This adjustable swim training belt is engineered to provide essential buoyancy and support for young children learning to swim. Constructed from durable, closed-cell foam, it ensures long-lasting performance and safety in the water. The modular design features multiple removable foam pads, allowing parents to customize buoyancy levels as the child's swimming skills improve.
