

# Adjustable Crown Spreader Pliers

Precision-engineered adjustable crown spreader pliers are designed for dental applications. Constructed from high-quality stainless steel, these pliers offer exceptional durability and resistance to corrosion.

## Product Overview

### Precision Dental Crown Spreader

These adjustable crown spreader pliers are precision-engineered for professional dental applications, specifically designed for crown and bridge fabrication and adjustments. Constructed from high-quality stainless steel, the tool offers exceptional durability and resistance to corrosion. The adjustable mechanism ensures precise control over crown expansion, while the ergonomically designed handles reduce hand fatigue during extended use.

## Technical Specifications

Model Number	DT2105A
Material	Stainless Steel
Application	Dental Laboratory, Dental Clinic, Crown Fabrication, Bridge Fabrication

## Features

### Key Features

- Adjustable mechanism for precise expansion control
- Corrosion-resistant construction
- Ergonomic handle design
- High-durability stainless steel build
