Overview

Professional Woodworking Doweling Jig

This adjustable doweling jig is engineered for creating straight holes and pocket holes with high accuracy and ease. It features a versatile design that works across a range of wood material thicknesses, making it an essential tool for professional joinery. The system ensures strong, professional-grade dowel joints for various furniture and cabinetry applications.

Key Features

Main Capabilities

- Accurate straight hole drilling
- Pocket hole capability
- Adjustable for multiple wood thicknesses
- Secure clamping mechanism
- Hardened steel drill guides

Technical Specifications

Build Material

Aluminum • Steel

Supported Material Thickness

3/4", 1", 1 1/4", 1 1/2"

Application

Supported Joint Types

- Edge-to-edge joints
- Edge-to-surface joints
- Corner joints
