

Adjustable Electric Scooter with Headlight

This electric scooter has adjustable handlebars and a seat for a comfortable ride. It features a sturdy frame and a front headlight.

Product Overview

Eco-Friendly Commuting Solution

This adjustable electric scooter is designed for efficient, short-distance personal transportation. Equipped with a reliable 250W motor and a dual-battery system, it offers a practical range of 20-25km on a single charge. The inclusion of an adjustable seat and handlebars, paired with an integrated headlight, ensures both comfort and visibility for the user.
