

Adjustable Eyeball Mains Downlight

This eyeball downlight is designed for GZ10 230V/240V lamps. Its adjustable eyeball allows for directional lighting.

Product Overview

Adjustable Eyeball Mains Downlight

This adjustable eyeball mains downlight is designed for versatility and precision in lighting design. Compatible with GZ10 230V/240V lamps, it operates directly on mains voltage, eliminating the need for external drivers. The adjustable eyeball mechanism allows for directional lighting, making it an excellent choice for accent lighting or focused general downlighting applications.
