Overview

Professional Solar Ground Mounting Solution

This comprehensive solar mounting system is designed for robust on-ground installations, offering a stable and secure platform for photovoltaic arrays. The kit includes an adjustable aluminum mounting structure that allows for optimized tilt angles to maximize sunlight capture year-round. Additionally, the package incorporates high-quality, UV-resistant solar cables and essential accessories like distribution boxes to ensure reliable power transmission and a complete, installation-ready solution for residential, commercial, or industrial projects.

Mounting System

Material	Aluminum
Installation Type	On-ground
Adjustable Tilt	Yes

Cabling & Electrical

Included Cable Colors

- Black
- Red

Cable Features

UV Resistant, Outdoor Rated, Photovoltaic Optimized

Included Components

Package Contents

- Mounting Structure
- Solar Cables
- Distribution Box
- Assembly Hardware
