

Adjustable Height Industrial Exhaust Fan

This high-performance electrical fan is designed for efficient air circulation and ventilation. It features a robust metal construction with a protective grill, ensuring durability and safety.

Product Overview

High-Performance Air Circulation

This industrial-grade exhaust fan is engineered for efficient air circulation and ventilation in demanding environments. Constructed with robust metal and a safety-focused protective grill, it ensures both long-term durability and operational safety. The unit features a multi-blade design to maximize airflow and an adjustable height mechanism, offering versatile positioning for various household and industrial cooling or exhaust applications.

Technical Details

Suitable Applications

- Household ventilation
- Industrial air circulation
- Workshop cooling

Construction Material	Robust Metal
Safety Features	Protective Grill, Industrial Grade
Adjustability	Yes
