Product Overview

Industrial Air Circulation Solution

This adjustable height industrial pedestal fan is engineered for powerful air circulation in demanding environments such as mineral factories, workshops, and large warehouses. It features a full pure copper motor designed for long service life, low noise operation, and low temperature-rising. Built for safety and durability, the fan includes an optimized aluminum-iron blade structure and a heavy-duty cross base for stability.

Technical Specifications

Motor Capabilities

- Full pure copper construction
- Low noise operation
- Low temperature-rising design
- Over-heat protection
- Overload protection function

Performance Metrics

3 levels

Speed Settings

Design & Construction

Safety & Build

Powder/Chrome Guard • Heavy-Duty Cross Base • Adjustable Height

Blade Options

2-Blade, 3-Blade, 4-Blade

Usage Applications

Recommended Environments

- Mineral factories
- Workshops
- Warehouses
- Large halls
