Product Overview

Professional Ventilation Solution

This portable high-velocity blower is engineered for efficient air supply and exhaust in demanding environments. Featuring a robust, adjustable design, it provides high wind pressure and significant airflow for deep or long-distance ventilation needs. It is an ideal tool for municipal engineering, shipbuilding, maintenance, and chemical industrial applications.

Technical Specifications

Model	SHT-25
Diameter	250 mm
Power Consumption	320 W
Voltage	220/240V
Frequency	50/60Hz

Performance Metrics

Key Performance Metrics

43 m³/min

Air Delivery Rate

294 pa

Wind Pressure

Rotation Speed

- 2800 r/min
- 3300 r/min

Features

Key Features

Portable, Adjustable Angle, Safety Switch, High-Velocity, Protective Grill

Applications

Recommended Applications

Communication Cable Maintenance • Shipbuilding & Repair • Municipal Underground Engineering • Chemical Industrial Factory • Tank Container Ventilation
