Overview

Versatile Industrial Clamping Solutions

This comprehensive series of hose clamps offers robust fastening solutions for a wide range of industrial, automotive, and plumbing applications. Designed for secure and reliable performance, the range includes specialized types such as heavy-duty American, German, British, and French double-wire clamps. Engineered to prevent leaks and ensure tight seals, these clamps provide high clamping force and long-lasting durability across diverse pipe and hose diameters.

Product Range

Available Clamp Types

Robust with Solid Nut, Double Bolt Double Band, Hollow Heavy Duty, Stainless Steel V-Groove, Germany Type, American Type, British Type, Hinged Pipe, U-Bolt Pipe, France Type Double Wire, Heavy Struct Channel, Pear Shape Hinged

Technical Specifications

Key Features

- High clamping force
- Leak prevention
- Adjustable clamping mechanism
- Durable metal construction

Heavy Duty Bandwidth

15.8 mm

Example Size Range

40-43 mm
