

Adjustable Jaw Bolt Cutter

This bolt cutter is designed with adjustable jaws for cutting bolts, rods and other metal materials. Its high-leverage handles provide increased cutting power and comfortable grips.

Product Overview

Professional Grade Cutting Power

This heavy-duty bolt cutter is engineered for demanding industrial applications, offering reliable performance for cutting bolts, rods, and various metal materials. The tool features an adjustable jaw mechanism, allowing operators to achieve precise cuts across different material sizes with ease. Designed with high-leverage handles and comfortable grips, it maximizes cutting efficiency while minimizing user fatigue during extended use.

Technical Specifications

Key Features

- Adjustable jaw mechanism
- High-leverage handle design
- Ergonomic grip handles
- Suitable for bolts and rods

Construction
