

Adjustable Molded Case Circuit Breaker

This molded case circuit breaker is designed for AC power distribution systems. It provides protection against overloads and short circuits with adjustable settings.

Product Overview

Professional Power Distribution

The ZKZZZ series Molded Case Circuit Breaker (MCCB) is an advanced solution engineered for reliable AC power distribution. Designed for robustness, this unit provides critical protection against overloads and short circuits in professional electrical systems. It features adjustable settings to cater to specific circuit requirements, ensuring operational flexibility and safety in industrial and commercial applications.

Electrical Ratings

Rated Current	225 A
Operating Voltage	AC 400V
Insulation Voltage	AC 690V
Rated Frequency	50 Hz

Performance Metrics

Key Performance Metrics

35 kA Ultimate Breaking Capacity (Icu)	25 kA Service Breaking Capacity (Ics)	6 kV Impulse Withstand Voltage
Tripping Characteristics		10In Instantaneous Tripping, Category A Utilization
