

Adjustable Nozzle Gravity Feed Spray Gun

This spray gun is designed for a variety of coating applications. The adjustable nozzle allows for precise control over the spray pattern and material flow.

Product Overview

Professional Performance

The KSG-867 is a versatile gravity-feed spray gun engineered for consistent performance across various coating applications. It features an adjustable nozzle that provides precise control over both material flow and spray patterns, ensuring high-quality results from fine detail work to large-scale coverage. Designed with ergonomics in mind, this tool reduces operator fatigue while minimizing material waste.

Performance Features

Key Benefits

- Adjustable nozzle for custom spray patterns
- Ergonomic handle to reduce user fatigue
- Optimized gravity-feed for reduced material waste
- Durable construction for long-term reliability
