

Adjustable Pet Barrier for Car

This adjustable pet barrier keeps dogs safely confined to the rear of a vehicle. It features sturdy wire mesh construction with adjustable telescopic poles for a secure fit in various car models.

Product Overview

Professional Vehicle Pet Safety Solution

This adjustable pet barrier is engineered to provide a secure and reliable containment solution for transporting dogs in various vehicle types. Its robust wire mesh construction ensures maximum visibility while maintaining a sturdy physical boundary between the cargo area and the passenger cabin. Designed for tool-free installation, it features telescopic poles and protective rubber feet to ensure a stable fit without damaging the vehicle's interior.
