

Adjustable Pipe Wrench

This pipe wrench is designed for gripping and turning pipes and fittings. It features a cast iron body and hardened steel jaws for durability and a secure grip on various pipe sizes.

Product Overview

Heavy-Duty Adjustable Pipe Wrench

This heavy-duty pipe wrench is engineered for reliable performance in demanding plumbing, construction, and industrial environments. Featuring a robust cast iron body and hardened steel jaws, it provides exceptional durability and strength for gripping and turning various pipes and fittings. The adjustable jaw mechanism ensures a secure, precise fit on a wide range of pipe diameters, making it an essential tool for professional-grade maintenance and installation tasks.

Technical Specifications

Body Material	Cast Iron
Jaw Material	Hardened Steel
Application Areas	Plumbing, Construction, Industrial Maintenance

Features

Key Features

- Adjustable jaw mechanism for versatile pipe sizes
- Heavy-duty construction for high torque applications
- Hardened steel jaws for superior grip and wear resistance
