

Adjustable Pipe Wrench for Plumbing

This pipe wrench is designed for gripping and turning pipes and fittings. It features a sturdy adjustable jaw that provides a secure hold and leverage.

Overview

Heavy-Duty Plumbing Solution

This adjustable pipe wrench is engineered for high-performance gripping and turning of pipes and fittings in demanding environments. Its sturdy construction ensures long-lasting durability for both plumbing and mechanical applications. Designed to provide reliable torque, it offers a secure hold and excellent leverage for tightening or loosening connections across various pipe sizes.

Key Features

Core Capabilities

- Heavy-duty design for professional use
- Adjustable jaw for versatile pipe sizing
- High-leverage handle for maximum torque
- Secure grip on smooth and threaded surfaces

Technical Details

Primary Application

Plumbing • Mechanical • Industrial Maintenance

Jaw Configuration

Adjustable sturdy jaw

Functionality

Gripping, Turning, Tightening, Loosening
