

Adjustable Pipe Wrench with Serrated Jaws

This pipe wrench is available in sizes from 8 inch to 48 inch. It is made with forged or imitation forging and has a light or dip plastic handle.

Product Overview

Professional Grade Adjustable Pipe Wrench

The P1400 series adjustable pipe wrench is engineered for versatility and reliability in demanding industrial environments. Featuring serrated jaws for a secure, non-slip grip, this tool is available in a wide range of sizes from 8 to 48 inches to accommodate various piping diameters. Built with durable forged construction and ergonomic handle options, it ensures optimal leverage and control for professional plumbing and maintenance tasks.
