

# Adjustable Rail Automatic Screw Feeder

This automatic screw feeder features an adjustable rail for various screw sizes. Its ESD-safe design protects sensitive electronic components during precision assembly.

## Product Overview

### High-Efficiency Automatic Screw Feeder

This adjustable rail automatic screw feeder is engineered to streamline high-speed assembly processes in professional manufacturing environments. It features a versatile, adjustable rail system that accommodates various screw head types and sizes, ensuring compatibility with standard, flat washer, and spring washer screws. Designed for precision and reliability, this unit delivers up to 120 screws per minute, significantly reducing assembly time while maintaining consistent operation.

## Technical Specifications

### Performance Metrics

**120 pcs/min**

Productivity

**20 mm**

Max Screw Stem Length

### Dimensions

Attribute	Value
Length	123 mm
Width	181 mm
Height	145 mm
Weight	2.92 kg

### Electrical Requirements

AC220V, DC12V 500mA with AC adapter

## Compatibility

### Compatible Screw Head Shapes

Standard, Flat Washer, Spring Washer, Flat Spring Washer

### Rail Configuration

Yes
