Product Overview

Professional Scaffolding System

This adjustable scaffolding system is designed for high-performance construction and maintenance applications. It features a versatile swivel clamp mechanism allowing for secure pipe connections at various angles to accommodate complex site configurations. Built to meet stringent European standards, the system ensures structural integrity, safety, and long-term durability in demanding environments.

Technical Standards

Certifications

SS-EN 12810-1

Technical Specifications

System Components

- Round Ringlock System
- Swivel Clamps
- Galvanized Steel Tubes
- Safety End Caps

Features

Corrosion Resistant • Heavy-Duty • Adjustable • Bolt-Tightened

Model IDs

- ALTRA
- BEN74-1M
