

Adjustable Shelving Refrigerator with Multi-Zone Cooling

This refrigerator features adjustable anti-leakage glass shelves for customizable storage. It offers a three-food management system with separate zones for refrigeration, moderate freezing, and strong freezing.

Overview

Professional Food Management

This advanced refrigerator features a unique three-food management system providing specialized zones for refrigeration, moderate freezing, and strong freezing. Designed for professional kitchens and modern households, it includes an intelligent VFD temperature control system and high-efficiency cooling technology. The robust construction with refined copper piping and R600a refrigerant ensures long-term reliability and environmental sustainability.
