

Adjustable Spring Balancer for Electronic Tools

This spring balancer is designed to suspend tools, offering a balanced and ergonomic workspace. It features an adjustable mechanism to modify spring tension, ensuring optimal tool positioning and minimizing operator fatigue.

Product Overview

Ergonomic Tool Suspension

This adjustable spring balancer is designed to suspend electronic tools, creating a balanced and ergonomic workspace that significantly reduces operator fatigue. The internal wire winding mechanism keeps the workspace tidy and safe by keeping the cable contained within the unit. With adjustable spring tension settings, it provides precise control for various electronic assembly applications.

Technical Specifications

Stroke Length Range

1.5 m Minimum Stroke	2.5 m Maximum Stroke
