

Adjustable Steel Access Gangway

This adjustable steel access gangway provides a safe and stable platform for personnel. Its robust construction and adjustable design make it suitable for various applications.

Overview

Robust Maritime Access Solution

This adjustable steel access gangway is engineered for demanding port and industrial environments. Featuring a heavy-duty lattice steel construction, it provides a stable and reliable platform for boarding and disembarking vessels. The design includes a tall vertical tower with multi-level access points, ensuring versatile operation in various maritime settings.

Technical Specifications

Key Features

- Adjustable gangway extension
- Multi-level platform access
- Vertical lattice tower support
- Heavy-duty steel construction

Material Construction	Heavy-duty lattice steel
Structure Type	Multi-level access tower with adjustable gangway
Primary Application	Maritime, Port Operations, Industrial Access
