

Adjustable Steel Wrench

This adjustable wrench is made from drop forged steel. It is designed for versatile gripping and tightening of various sized nuts and bolts with its adjustable jaw.

Product Overview

Professional Grade Adjustable Wrench

This adjustable steel wrench is engineered for versatility and reliability in demanding work environments. Crafted from high-quality drop forged steel, it offers exceptional durability for gripping and tightening various sized nuts and bolts. The precision-adjustable jaw mechanism ensures a customized, secure fit, making it an essential tool for professional mechanical and maintenance tasks.

Technical Specifications

Primary Applications

- Nut tightening
- Bolt securing
- Mechanical maintenance
- Versatile gripping

Material Construction	Drop Forged Steel
Product Attributes	Drop Forged, Adjustable Jaw, Heavy Duty
