

Adjustable Telescopic Communication Antenna

This antenna is designed for enhanced signal reception and transmission. It features a multi-stage telescopic design, allowing for adjustable height and improved signal capture.

Overview

Professional Communication Antenna

The JBA-501 is a specialized antenna engineered for superior signal reception and transmission performance. Featuring a multi-stage telescopic design, this unit offers adjustable height capabilities to optimize signal capture in diverse environmental conditions. Built with high-quality materials, it ensures long-term durability and reliable connectivity for a wide range of professional communication devices.

Technical Specifications

Model Number	JBA-501
Design Type	Multi-stage telescopic
Device Compatibility	Communication Devices, Signal Transceivers

Features

Key Features

- Adjustable telescopic height
- Enhanced signal reception
- Integrated stable mounting system
- High-durability material construction

Performance Highlights

1 Level

Signal Optimization
