

Adjustable Temperature Heat Gun

This heat gun is a versatile tool for various applications, including paint stripping and heat shrinking. It features adjustable temperature settings for precise control and optimal results.

Product Overview

Versatile Heat Application Tool

This adjustable temperature heat gun is a professional-grade tool designed for precision and reliability. It excels in diverse applications ranging from paint stripping and softening adhesives to loosening rusted components and heat shrinking. With an ergonomic design and precise temperature control, it offers comfort and performance for both industrial professional tasks and rigorous DIY projects.

Technical Specifications

Key Capabilities

- Adjustable temperature settings
- Ergonomic handle for extended use
- Versatile heat shrinking
- Adhesive softening capability
- Paint stripping

Use Cases

Paint Stripping, Heat Shrinking, Adhesive Softening, Maintenance

Compliance and Standards

Suitable Environments

Professional Use • DIY Project Ready
