

# Adjustable Temperature Hot Air Gun

This hot air gun is a versatile tool used for various applications such as removing paint and bending plastics. It features adjustable temperature settings for precise control and a powerful heating element for efficient operation.

## Product Overview

### Professional Hot Air Gun

This adjustable temperature hot air gun is designed for precision and versatility in various professional applications. It features a powerful heating element with a maximum input of 2000W, allowing for efficient performance across different tasks. With multiple temperature and airflow settings, users can achieve the exact heat required for their specific project needs.

## Technical Specifications

Input Power	2000 W
Voltage	230 V
Frequency	50 Hz

## Performance Metrics

### Operating Modes

Mode	Temperature	Air Flow
I	50°C	300 L/min
II	70-600°C	300 L/min
III	70-600°C	500 L/min

## Certifications & Packaging

### Certifications

CE

### Packaging Type

Color box
