

# Adjustable Thermostat Fan Heater

This fan heater features two heating settings at 1000W and 2000W. It also has a normal fan setting for summer use and includes overheating protection.

## Overview

### Compact and Efficient Heating Solution

The FH-108(ST) fan heater is a compact, efficient solution designed for personal space heating in small to medium-sized rooms. Featuring an adjustable thermostat and multiple heat settings, it allows users to customize their comfort levels easily. With built-in safety features like overheat protection and a cool-touch housing, it offers both performance and peace of mind for supplemental heating needs.
