Product Overview

Versatile Industrial Timing Control

This adjustable time delay relay is engineered for demanding industrial automation and control systems. Featuring highly precise timing settings ranging from 1 second up to 100 hours, it allows for granular control through rotary selection dials. Its compact form factor is specifically designed for seamless integration into electrical control panels and automation enclosures.

Technical Specifications

Available Timing Settings

- 1s
- 10s
- 1m
- 10m
- 1h
- 10h
- 30h
- 100h

Control Interfaces

Rotary Time Selection • Percentage Fine-Tuning Dial • Multi-Mode Functionality

Timing Range

1s to 100h

Operational Metrics

Operational Performance

100 hours

Maximum Timing

1 second
