

Adjustable Top Brace Rod for Trucks

This adjustable top brace rod is designed for heavy-duty applications, providing essential stability and precise alignment. It features robust construction with black-finished components, yellow bushings, and a hexagonal central adjustment section.

Product Overview

Adjustable Top Brace Rod

This adjustable top brace rod is engineered for heavy-duty applications, providing essential stability and precise alignment for industrial machinery and automotive systems. Featuring a robust construction with a hexagonal central adjustment section, it allows for fine-tuned positioning to meet exact requirements. The assembly includes high-quality end joints with yellow bushings, ensuring durability and reliable performance under demanding conditions.

Technical Specifications

Bushing Color

Yellow

Hardware Included

- End joints
- Securing bolts

Construction Type

Adjustable rod with hexagonal central adjustment section

Finish

Black-finished components

Applications

Primary Applications

Heavy-duty Trucks, Industrial Machinery, Automotive Systems
