

Adjustable Trigger Sprayer for Irrigation

This trigger sprayer is a robust irrigation component designed for efficient water distribution. Constructed from durable plastic and metal, it features an adjustable spray pattern and flow rate for customized irrigation.

Product Overview

Adjustable Irrigation Trigger Sprayer

The 10PYS Trigger Sprayer is a robust irrigation component designed for efficient water distribution in agricultural and landscaping applications. Featuring an adjustable spray pattern and precise trigger mechanism, it allows for customized irrigation to help minimize water waste. Constructed from durable materials, this sprayer integrates seamlessly with standard irrigation systems to provide reliable performance in gardens and fields.

Technical Specifications

Model	10PYS
Inlet Size	1/2 inch
Nozzle Diameter	3.5 mm

Performance Metrics

Operating Performance

0.22 Mpa

Average Pressure

1.17 m3/h

Average Capacity

11.75 M

Avg Spray Radius

Sprinkler Density	2.69 - 3.00 mm/h
-------------------	------------------

Key Features

Best For	Agricultural, Landscaping, Gardening, Lawn Irrigation
