Product Overview

Industrial Ventilation Solution

This portable U-style blower is designed for high-performance ventilation in demanding industrial environments. Featuring a robust structure and convenient portability, it provides reliable airflow for both supply and exhaust operations. Its adjustable design makes it ideal for specialized applications like cable maintenance, shipbuilding, and underground engineering projects.

Technical Specifications

Performance

43 m³/min

Air Delivery

294 pa

Wind Pressure

320 W

Power Output

| | |
|-------------------|------------|
| Rotation Speed | 3300 r/min |
| Operating Voltage | 220/240V |
| Blade Diameter | 250 mm |

Key Features

Core Advantages

- Adjustable U-style stand for directional control
- Integrated safety switch
- High-velocity airflow
- Durable metal construction
- Protective safety grill

Application Areas

Applied Industries

Communication Cable Maintenance, Shipbuilding, Underground Engineering, Chemical Industry, Tank Maintenance
