

Adjustable Water Pump Pliers

Water pump pliers, known as adjustable pliers, are versatile hand tools for gripping and turning nuts, bolts, pipes, and irregular objects. The E04 model features adjustable jaws, durable steel construction, and ergonomic handles.

Product Overview

Versatile Adjustable Water Pump Pliers

These adjustable water pump pliers, also known as groove joint pliers, are essential hand tools designed for gripping and turning nuts, bolts, pipes, and other irregularly shaped objects. Engineered for durability, the E04 model is constructed from high-quality steel to ensure strength and longevity during demanding tasks. With ergonomic handles and a precise adjustable joint, these pliers provide a secure grip and comfortable operation for plumbing, automotive repair, and general maintenance.
