

Adjustable Worm Gear Hose Clamp

This worm gear clamp is designed to secure hoses, tubes, and pipes. When the screw is tightened, it pulls the band tighter around the hose or pipe, creating a secure seal.

Product Overview

Marine Grade Worm Drive Clamp

This 9/16 inch worm drive clamp is designed for applications requiring robust resistance to corrosion, such as in recreational boating. Constructed entirely from 300-grade stainless steel, it offers reliable performance for securing hoses, tubes, and pipes. The clamp features an adjustable design for ease of installation and a secure, tight seal across various industrial and automotive environments.

Technical Specifications

Material Grade	300 Grade Stainless Steel
Band Width	0.5625 inches
Screw Head	5/16 inch hex-head

Standards and Compliance

SAE J1508 Classification
Type F

Usage Recommendations

Application Guidance

- Suitable for recreational boating
- Ideal for automotive, plumbing, and industrial use
- For commercial shipping or extreme corrosion resistance, 316 stainless steel is recommended
