Product Overview

NF Series ADSS Dead-End Clamp

The NF series UV-protected dead-end clamp is engineered for the fast and reliable termination of fiber optic cables in access networks. Featuring an automatic wedge-gripping mechanism within a conical body, it ensures secure cable fixation without the need for specialized installation tools. This solution is designed to support spans up to 100 meters, providing robust mechanical performance while maintaining optimal optical integrity.

Technical Specifications

Maximum Span	100 m
Installation Features	No special tools required, Automatic wedge gripping, Fast installation

Standards & Compliance

Standard	NFC33-042
----------	-----------

Environmental & Material

Protection
UV Protected • Corrosion Resistant
