

# Adult Electric Scooter with Long Range Battery

This electric scooter is designed for adults and features a powerful 60V 3000W motor. Its 43.2Ah battery provides a long riding range of 100-110 km.

## ADDITIONAL IMAGES

## Overview

Engineered for distance, the robust frame houses a high-capacity 43.2Ah battery providing over 100km of range.

### High-Performance Long-Range Electric Scooter

This professional-grade electric scooter is engineered for extreme performance and long-distance travel, featuring a massive 43.2Ah 60V battery pack that delivers a range of up to 110 km. Powered by dual 3000W motors, it handles steep inclines up to 60° and reaches speeds of up to 100 km/h. Built with an aviation-grade aluminum alloy frame and 13-inch off-road tires, it offers a robust 400kg load capacity, making it one of the most durable and capable scooters in its class.

## Performance Metrics

Dual 3000W motors provide exceptional torque for off-road terrain and steep 60-degree inclines.

## Power System

Motor Configuration	60V Dual 3000W Motors
Battery Capacity	43.2 Ah
Charging Duration	5-6 hours
Charger Compatibility	2A Standard, 5A Fast Charge

## Chassis & Build

Frame Material	Aviation Aluminum Alloy
Tires	13-inch pneumatic off-road tires
Suspension	Front and rear dual spring suspension

## Safety & Control

The intuitive control center features a digital display, motor mode toggles (Single/Dual), and performance settings (Eco/Turbo).

### Integrated Lighting

- LED Headlight
- Rear Tail Light
- Brake Light
- Frame Ambient Lighting

### Control Interface

- Foldable design
- Digital parameter display
- Eco/Turbo mode selection
- Single/Dual motor toggle
- Turn signal controls

### Braking System

Front and rear hydraulic oil brakes

## Technical Specifications

### Max Climbing Angle

60 °
