Product Overview

Heavy-Duty Stability Solution

This counterweight is engineered specifically for aerial work platforms to ensure optimal stability and balance during operation. Constructed from durable, high-grade materials, it features a protective coating that enhances resistance to wear and corrosion in demanding industrial environments. The robust design includes precise mounting points to facilitate secure attachment, delivering reliable performance for heavy-duty lifting equipment.

Technical Specifications

Mounting Configuration

- Central mounting opening
- Side mounting holes
- Recessed fitting section

Design Features

Heavy-duty construction, Corrosion-resistant coating, Precise weight distribution, Multiple mounting points

Physical Properties

Surface Finish

Powder-coated • Textured
