

Aerodynamic Street Light Fixture with Blue Lens

This modern street light fixture features a sleek, aerodynamic design. Its blue lens is designed to diffuse light evenly for enhanced visibility.

Product Overview

Aerodynamic Street Lighting Solution

This modern street light fixture features a sleek, aerodynamic design engineered for durability and efficient light distribution. Equipped with a specialized textured blue lens, it is optimized for improved visibility and reduced light pollution in outdoor environments. Its robust, weather-resistant construction makes it an ideal choice for street, parking lot, and pathway lighting applications.

Design & Construction

Design Style

Aerodynamic • Compact • Integrated

Housing Material

Durable, weather-resistant aluminum/high-impact polymer

Lens Material & Finish

Textured blue polycarbonate/acrylic

Application & Usage

Suitable Applications

- Street lighting
- Parking lot illumination
- Pathway lighting

Key Lighting Benefits

Even light diffusion, Enhanced visibility, Reduced light pollution
