

# Aerosol Tire Inflator with Sealant

This aerosol tire inflator provides a temporary solution for repairing and inflating tires. It contains a sealant to plug punctures and compressed gas to inflate the tire to a usable pressure for emergency roadside use.

## Product Overview

### Emergency Tire Repair Solution

This aerosol tire inflator and sealant is designed for quick, roadside emergency repairs. It effectively plugs punctures while simultaneously inflating the tire with compressed gas to a driveable pressure. Compact and user-friendly, it allows drivers to safely reach the nearest service facility for professional maintenance.

## Technical Specifications

### Core Functions

- Seals tire punctures
- Rapid inflation
- Compact aerosol delivery

### Application

Emergency Repair, Roadside Assistance, Temporary Sealing

## Usage Guidelines

### Intended Use Case

Emergency roadside use to reach a service station.
