

AG3 Alkaline Button Cell Battery

This alkaline button cell battery is suitable for small electronic devices. It provides a stable voltage output and long-lasting performance.

Overview

Reliable Power for Small Devices

The AG3 Alkaline button cell battery is designed to provide a consistent and stable power source for a wide variety of small electronic devices. Engineered for long-lasting performance, it delivers reliable voltage output essential for precision equipment. This compact power solution is an ideal choice for maintaining the functionality of watches, calculators, remote controls, and other portable electronics.

Technical Specifications

Rated Voltage

1.5 V
Voltage

Battery Chemistry	Alkaline
Model	AG3

Applications

Suitable Applications	Watches, Calculators, Remote Controls, Small Electronics
