Overview

SSB 3000 Aggregate Spreader

The SSB 3000 is a specialized spreader designed for the efficient application of aggregates in road construction and maintenance projects. Featuring both pneumatic and electric drive systems, it is engineered for seamless integration with dumpers, ensuring advanced performance on the job site. This unit is built for easy assembly and disassembly, providing a reliable solution for uniform material distribution.

Performance Metrics

Spreading Capacity

50 m³/km²

Max Capacity

18 km²/h

Area Coverage

| | |
|-----------------|--------|
| Spreading Width | 3.1 m |
| Spreading Speed | 5 km/h |

Technical Details

| | |
|------------------------------|---------------------|
| Aggregate Size Compatibility | S34-S3 |
| Drive Systems | Pneumatic, Electric |
