

AGM VRLA Rechargeable Battery

This valve-regulated lead-acid (VRLA) battery features a non-spillable design due to its ABS construction. It has a low self-discharge rate, is flame-retardant, and can be mounted in multiple positions.

Product Overview

AGM VRLA Rechargeable Battery Series

These Valve Regulated Lead Acid (VRLA) batteries, featuring Absorbent Glass Mat (AGM) technology, are designed for maintenance-free operation and high reliability. Their spill-proof construction allows for versatile mounting orientations, making them suitable for a wide range of critical applications including UPS systems, emergency lighting, security setups, and portable power devices. This series offers a comprehensive range of voltage and capacity options to meet diverse power requirements.

Key Features

Maintenance-free, Spill-proof, AGM Technology, Rechargeable, Versatile Mounting

Technical Specifications

Model Specifications

Model	Voltage (V)	Capacity (Ah)	Weight (kg)
SN06001.3	6	1.3	0.28
SN06003.2	6	3.2	0.63
SN06004	6	4	0.68
SN06004.5	6	4.5	0.72
SN06005	6	5	0.75
SN06007	6	7	1.09
SN12250	12	250	69

Safety & Handling

Safety Guidelines

- Avoid short circuits
- Do not charge in a sealed container
- Keep away from sparks and flames
- Recharge immediately after discharge
